AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings of claims in the application:

LISTING OF CLAIMS:

- (Original) A thin-walled plastic tube (1) having an axial direction (a) and a radial direction (r), the plastic tube (1) being manufactured by injection moulding and comprising a tube body (2) with a tube shoulder with an emptying opening (4) at a first end (8) and an end closure (10) at a second end (9), the tube body (2) having a wall thickness of 0.3-1.2 mm, characterized in that the plastic tube (1) comprises a label (11) applied simultaneously with the injection moulding, the label (11) comprising a plastic film with a tensile strength in the axial direction (a) of the tube (1) which is at least 100 N/mm², preferably at least 150 N/mm², and most preferably at least 210 N/mm² measured according to DIN ISO 527-1/ -3, an elongation at break which is at most 70%, preferably at most 50%, and most preferably at most 25% measured according to DIN ISO 527-1/-3, and a thickness of at most 90 μ m and preferably of at most 75 μm .
- 2. (Original) A thin-walled plastic tube (1) according to Claim 1, the plastic film having a tensile strength in the radial direction (r) of the tube (1) of at least 50 N/mm², preferably at least 80 N/mm², and most preferably at least 120 N/mm², and an elongation at break of at most 250%, preferably at most 200%, and most preferably at most 110%.

- 3. (Currently Amended) A thin-walled plastic tube (1) according to Claim 1 [[or 2]], the label (11) extending around the entire tube body (2) in the radial direction (r).
- 4. (Currently Amended) A thin-walled plastic tube according to Claim 1, $\frac{2 \text{or } 3}{7}$ the label (11) extending over the entire length of the tube body (2), from the shoulder edge (13) to the end closure (10).
- 5. (Currently Amended) A thin-walled plastic tube (1) according to claim 1 any one of Claims 1-4, the label (11) extending in the longitudinal direction into the end closure (10) on the tube body (2).
- 6. (Currently Amended) A thin-walled plastic tube (1) according to claim 1 any one of the preceding claims, the label (11) extending in the longitudinal direction over the edge (13) between the tube body (2) and the tube shoulder (3).
- 7. (Currently Amended) A thin-walled plastic tube (1) according to claim 1 any one of the preceding claims, the plastic film being a multilayer film comprising at least one layer of oriented polypropylene.
- 8. (Currently Amended) A thin-walled plastic tube (1) according to <u>claim 1</u> any one of the preceding claims, the end closure (10) of the tube body (2) having a non-linear curved shape.
- 9. (Currently Amended) A thin-walled plastic tube (1) according to claim 1 any one of the preceding claims, the plastic film having a density of between 0.4 and 1.2 g/cm 3 and preferably between 0.5 and 1.0 g/cm 3 .

- 10. (New) A thin-walled plastic tube (1) according to Claim 2, the label (11) extending around the entire tube body (2) in the radial direction (r).
- 11. (New) A thin-walled plastic tube according to Claim 2, the label (11) extending over the entire length of the tube body (2), from the shoulder edge (13) to the end closure (10).
- 12. (New) A thin-walled plastic tube according to Claim 3, the label (11) extending over the entire length of the tube body (2), from the shoulder edge (13) to the end closure (10).
